DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/29/04 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 6,168,203 Amamori.

4. Amanmori discloses an airbag, which is easily sewn up, and which is capable of providing a large extent of thickness when inflated is formed of two pieces of panels A, B. The panels A, B are superposed on each other and sewn by a seam along sides 1, 2, 3, 11, 12, and 13 so as to make an envelope. Sides 4a, 4b are sewn by a seam 30. The open edges other than the sewn edges of the envelope are sequentially sewn by seams 50 and 60 (abstract). As is shown in Figure 18, reference number 9 indicates the placement for the inflation canister. Thus USPN 6,168,203 anticipates an airbag cushion having at least two fabric blanks superimposed upon one another and connected via at least one seam and has an opening for the insertion of the inflation canister.
